H. RESEARCH SUPPORT

Past Research Support: (Summarize)

AIDS Clinical Trials Group (ACTG 200) A Randomized Trial of 'Topical Vaginal Fluorouracil (5 Fluorouracil, 5FU) Maintenance Therapy vs. Observation After Standard Treatment for High Grade Cervical Dysplasia in HIV-Infected Women Site PI Boston Medical Center	1993-1995
--	-----------

The goal of this study was to determine if 5FU decreased the recurrence risk for dysplasia in HIV-infected women.	
AIDS Clinical Trials Group Women and Infants Transmission Study – Natural History Study of HIV Disease and Pregnancy National Institutes of Health Site PI Boston Medical Center The goal of this study was to determine the natural history of HIV disease in pregnant women.	1994-1995
GYN Care Onsite for HIV Infected Women, Ryan White CARE Act Site PI Boston Medical Center The purpose of this grant funding was to establish a gyn clinic for HIV-infected women.	1995-1997
A Randomized Trial of Epidural Anesthesia and Intrapartum Fever (PACE & LABOR) Co-Investigator National Institutes of Health The goal of this trial was to elucidate the determinants of epidural-related fever.	2002-2005
Serologic Assays for the Diagnosis of HSV-2: Development of Testing Strategies Co-Investigator (PI Dona Felsenstein) National Institutes of Health The goal of this project is to determine the accuracy of commercially available HSV-2 tests for diagnosis in a population-based sample.	2009-2011
Redesigning Obstetrical Care with a focus on Induction Principal Investigator MGH Clinical Innovation Award The goal of this study is to assess the effect of practice patterns on the induction process.	2012-2013
Use of Modeling to Improve Processes on Labor & Delivery Co-Investigator MIT – MGH Collaboration The goal of this study is to maximize operating processes on L&D utilizing mathematical modeling.	2013-2014
Maternal Immunity against Viruses and Vaccines Co-Investigator National Institutes of Health The study will evaluate the phenotype and function of placental immune cells which control viral infections within the placenta.	2011 – 2016
Rapid-cycle Survey Collaborative for Provider Input on Immunization Issues Co-Investigator CDC Cooperative Agreement # 1 U01 IP000849-02 PI: Allison Kempe, MD MPH	2015-
A comprehensive prenatal intervention to increase vaccine coverage Consultant National Institutes of Health: Dissemination and Implementation Research in Health (R01)	2015-

Develop and evaluate a comprehensive intervention at the patient, provider and practice levels to increase maternal and childhood vaccine uptake. PI: Daniel Salmon, Johns Hopkins University, and Saad Omer, Emory University	
Indicators of intrapartum maternal infection Co-Investigator The goal of this study is to design a tool to predict which febrile laboring patients require antibiotics to treat infection versus those with noninfectious inflammation	2016-
Quality Improvement for inpatient maternal health care at tertiary care facility Bank of America Foundation Grant Principal Investigator (\$100,000 / year x 2yrs) Develop and support a quality assurance and quality improvement system in partnership with Mbarara University of Science and Technology Department for Obstetrics and Gynecology	2017-2018

For **Current extramural and intramural research funding**, provide the following for each award:

1. Source, amount, and duration of support (dates)
2. Name of Principal Investigator
3. Individual's role in project, including percentage (%) effort

Candidates are encouraged to annotate multi-investigator grants to clarify their role on the project (PI, Site PI, Project leader, Core director, etc.)

L. BIBLIOGRAPHY

Entries should follow standard journal format, listing all authors, complete titles and inclusive pagination. Please also provide a URL to each of your published works as found in a publicly available digital database such as PubMed or My Bibliography, which are maintained by the US National Library of Medicine.

Publications also may be annotated here (or in the Key Contributions Statement) to indicate the role of the candidate, where appropriate. This should be considered for co-first authorship, co-senior authorship, and in publications in which the candidate played an

important role (leadership of a site, or methodology, etc.) that may not be apparent from the author order.

Number the entries and put your name in bold type. The listings must be organized in chronological order. Use the following categories:
